

William Angliss Institute, Melbourne

Case Study

The William Angliss Institute is a specialist centre for training and vocational education in hospitality, tourism and culinary arts, located at 555 LaTrobe Street, Melbourne.

When Edwards Moore architects were designing a new entrance off King Street, they consulted with record Automatic Doors to provide a suitable automatic door solution.

A large single sliding automatic door was designed, 2850mm high x 3700mm wide, to provide a wide and welcoming automatic door entrance to the building.

Working with Harris HMC, the record STA 22 heavy duty sliding door operator was installed, along with a 300kg aluminium framed single sliding door.
