

Tesco store, Rugby (UK)

Case Study

This is an installation of the record uk telescopic TSA 20 at the Tesco store in Rugby. The store required an entrance capable of allowing the safe passage of large numbers of people at one time, and at the same time not leave the entrance open to the elements for unduly long periods. This was achieved by the installation of automatic folding doors at both sides of the wide entrance, thus allowing maximum access while mimimising rapid ingress of cold air and dicomfort for customers and staff.
